

Heart-hub a web application

B. M. Osman*

August 21, 2025

The URL `https://hearthub-bjyb3bzoe-babikerosmans-projects.vercel.app/dashboard.html` points to a deployment of **HeartHub**, a web application hosted on Vercel.

HeartHub is an open-source Python toolkit by GitHub user babikerosman468, focusing on heart-based data science, coherent consciousness research, and community resilience modeling.

The GitHub repository provides backend tools and documentation, but does not include a detailed frontend dashboard. The deployed URL appears to serve as a custom frontend interface. Without access to the source code or further documentation, a detailed description of its functionalities is limited.

For further exploration or contribution, the project repository can be accessed at GitHub.
